

INSTALLATION & SERVICE TECHNICIAN LEVEL #1

General Overview:

TotalKare of America, Inc. is a leading healthcare security systems integrator located in Syracuse, New York. Our core competency for almost 30 years, has been the design, integration, implementation and maintenance of electronic security systems in nursing homes, hospitals, independent living, and assisted living facilities throughout the Northeast. Systems include infant and wander protection, emergency response, fall detection, nurse call, access control, CCTV and other customized solutions. We are a family owned business and an equal opportunity employer. Please visit our website at www.totalkare.com to learn more about TotalKare.

We are seeking a career minded individual with a strong work ethic and dedication to serve our customer base. Most work will be performed in a healthcare setting among nursing staff, patients and residents requiring discretion, professionalism, and a respectful attitude at all times. This position requires **travel Monday through Friday with overnight stays** as we cover all of New York State, including NYC and LI, parts of New England and New Jersey.

Responsibilities and Expectations:

- Run cable, make terminations, testing (to include documentation of test results), troubleshooting & labeling of said cable.
- Fire-stop various types of cable penetrations
- Mount equipment
- Other tasks assigned by Project Manager or Service Coordinator.
- Excellent communication skills required; clear, concise communication with customers and the office regarding ETA to a job site and status of job completion.

Qualified Candidate "Must-Haves":

- Low voltage circuitry and testing experience preferred
- Commitment to maintain a safe, clean, and organized work environment
- Commitment to excellence and quality work
- Excellent communication and organization skills
- Good computer and Smartphone skills
- Ability to work with a team and be self-motivated and disciplined to also work independently
- Ability to handle and properly use common power and hand tools (**must own your own basic tools**)
- Valid driver's license with no infractions
- Willingness to work in tight, confined areas (ceilings etc.)
- Ability to carry heavy loads and climb ladders
- Willingness to work overtime as required

Desired but NOT Required Qualifications:

- Individuals with construction knowledge and/or running of low voltage wire
- Working knowledge of various types of security/video systems
- Ability to read blueprints, floor plans, CAD drawings and specs
- Experience in security & access control systems and hardware
- Ability and desire to learn new technologies

Benefits

- 401K Plan
- Health and Dental Plan
- Paid Time Off
- Overtime Pay
- Reimbursable Expenses
